

# Leading Data Center Optimization Company Extends Market Reach with New Offices in Texas and Oklahoma

*Expansion allows CEG to offer economies-of-scale for clients with data centers, mission-critical facilities across Southern and Eastern US.*

GLASSBORO, NJ, UNITED STATES, March 30, 2023 /EINPresswire.com/ -- [Critical Environments Group \(CEG\)](https://www.criticalenvironmentsgroup.com/), a leading provider of infrastructure optimization solutions for mission critical facilities, is extending its footprint throughout the Southern United States with the recent opening of new satellite offices in Texas and Oklahoma.

“

Having a presence in Texas and Oklahoma is a logical step in CEG's business growth strategy. We'll be able to offer economies-of-scale to clients with critical facilities anywhere in the Southern US.”

*Mike McClain, CEO of Critical Environments Group*

In addition to the Company's current offices in Georgia and Florida, CEG is expanding its Southern presence in Dallas, Austin, Houston, and San Antonio as well as Tulsa, Oklahoma. CEG is headquartered in New Jersey, with additional locations in Pennsylvania.

Texas's central location, affordable cost of living, highly educated workforce and supportive business climate have helped make it a booming epicenter for technology growth. “Having a presence in this area is a logical step in CEG's business growth strategy,” says Mike McClain, Chief Executive Officer of CEG. “Not only will we have access to new markets and new customers, but we'll also be able to

offer economies-of-scale to existing clients with critical facilities anywhere in the Southern US.”

For over 25 years, CEG has assisted municipalities, schools, hospitals, financial institutions, manufacturing plants, colocation facilities, and commercial buildings in optimizing their IT environments – data centers, network closets, server rooms, telecom centers, laboratories. The Company specializes in [custom containment](#) for IT infrastructure, offering turnkey design and

installation of unique airflow management solutions. In addition to reducing energy consumption and improving efficiencies, these solutions will assist critical facilities in Oklahoma and Texas with their decarbonization efforts and sustainability goals.

CEG also offers custom server room cabinets and racks, cabling, media storage, and environmental monitoring, as well as a complete line of [critical power products](#) – UPS systems and batteries, power distribution units, generators, power conditioning, and associated maintenance services. CEG partners with the industry's leading equipment providers including Schneider Electric, Vertiv, Eaton, Legrand, Mitsubishi Electric, Upsite Technologies, and RLE Technologies.

Custom Containment for Data Centers

In 2021, CEG was named by US Business News as the Top Critical Infrastructure Consultancy in the Eastern U.S. The Company has also been named to Inc. 5000 in 2018 and 2020.
