According to HTF Market Intelligence, the Global

Passwordless Authentication Software market to witness a CAGR of 26.2% during forecast period of 2023-2028. The market is segmented by United States Passwordless Authentication Software

Passwordless Authentication Software

Market Breakdown by Type (On-Premises, Cloud-Based) by Organization Size (Small & Medium Enterprises (SMEs), Large Enterprises) by Industry Verticals (BFSI, Government IT & Telecom, Retail & Consumer Goods Media & Entertainment Healthcare, Energy and Power Manufacturing, Others) and by Geography (North America, South America, Europe, Asia Pacific, MEA). The Passwordless Authentication Software market size is estimated to increase by USD 40.20 Billion at a CAGR of 26.2% from 2023 to 2028. The report includes historic market data from 2017 to 2022E. Currently, market value is pegged at USD 12.8 Billion.

Definition:

Passwordless authentication software refers to a type of software that enables users to access their accounts without the need for a password. Instead of relying on passwords, these systems use alternative methods for verifying a user's identity, such as biometric authentication (e.g., fingerprints, facial recognition), cryptographic keys, or mobile device authentication. Passwordless authentication software is designed to enhance security, reduce the risk of password-related attacks (e.g., phishing, credential stuffing), and improve the user experience by eliminating the need for users to remember and manage complex passwords. The market for passwordless authentication software includes various vendors, such as cybersecurity companies, identity and access management (IAM) providers, and cloud service providers.

Market Trends:

Technological Advancements in Passwordless Authentication Software

Market Drivers:

The Rising Risks from Phishing and Password Attacks

Market Opportunities:

The Rising Adoption of Passwordless Authentication Software across the Medium Size Enterprises

The titled segments and sub-section of the market are illuminated below:

The Study Explore the Product Types of Passwordless Authentication Software Market: On-Premises, Cloud-Based

Key Applications/end-users of Passwordless Authentication Software Market: Small & Medium Enterprises (SMEs), Large Enterprises

Make an enquiry to understand outline of study and further possible customization in offering <https://www.htfmarketintelligence.com/enquiry-before-buy/united-states-passwordless-authentication-software-market>

With this report you will learn:

- Who the leading players are in Passwordless Authentication Software Market?

- What you should look for in a Passwordless Authentication Software
- What trends are driving the Market
- About the changing market behaviour over time with strategic view point to examine competition

Also included in the study are profiles of 15 Passwordless Authentication Software vendors, pricing charts, financial outlook, swot analysis, products specification & comparisons matrix with recommended steps for evaluating and determining latest product/service offering.

List of players profiled in this report: Microsoft (United States) , Privacy, Inc. (United States) , Reach Five (France) , Trussing (United States) , Ping Identity (United States) , Lubicon (United States), Secret Double Octopus (Israel) , Authentic (United Kingdom) , Cosmos Inc. (United States) , Groove id (United States) , HYPR (United States)

Who should get most benefit of this report?

- Anyone who are directly or indirectly involved in value chain cycle of this industry and needs to be up to speed on the key players and major trends in the market for Passwordless Authentication Software
- Marketers and agencies doing their due diligence in selecting a Passwordless Authentication Software for large and enterprise level organizations
- Analysts and vendors looking for current intelligence about this dynamic marketplace.
- Competition who would like to benchmark and correlate themselves with market position and standings in current scenario.
