Definition:

Cloud Access Security Brokers (CASB) is a software service between the cloud provider's™s and an organization's on-premises infrastructure. It enables the organization to extend the range of its security policies beyond its own infrastructure. It delivers data management, security, automatic malware prevention, and others. According to IBM, in 2017, data breaches dropped by nearly 25 percent but there was 424% jump in breaches related to misconfigured cloud infrastructure owing to human errors. Thus increasing number of cyber-attacks driving the need for CASB services. In addition, increasing adoption in small and medium enterprises and technological advancement in the software industry boosting the demand for CASB services.

Market Trends:

- Increasing Demand for CASB for Real-Time Security Management
- Rising Adoption of Strong Network Security Solutions in Organizations

Market Drivers:

- Rising Adoption of Cloud-Based Services
- Increasing Demand for CASB for Compliance and Threat Management Solutions
- Provide Visibility to the IT Department Regarding Usage of Sanctioned and Unsanctioned Cloud Services

Market Opportunities:

- Increasing Demand from Small and Medium Enterprises (SMEs)
- Technological Advancement in the IT and Software Industry

Revenue and Sales Estimation — Historical Revenue and sales volume are presented and further data is triangulated with top-down and bottom-up approaches to forecast complete market size and to estimate forecast numbers for key regions covered in the report along with classified and well-recognized Types and end-use industry.

SWOT Analysis on Cloud Access Security Brokers Players

In addition to Market Share analysis of players, in-depth profiling, product/service, and business overview, the study also concentrates on BCG matrix, heat map analysis, FPNV positioning along with SWOT analysis to better correlate market competitiveness.

Demand from top-notch companies and government agencies is expected to rise as they seek more information on the latest scenario. Check the Demand Determinants section for more information.

Regulation Analysis

- Local System and Other Regulation: Regional variations in Laws for the use of Cloud Access Security Brokers
- Regulation and its Implications
- Other Compliances
