The financial services software market consists of sales of financial services software by entities (organizations, sole proprietorships, and partnerships) that are used to deliver best practices for developing fintech software, which assists organizations with the digital transformation of financial services. Financial software is a type of software that is specifically designed to automate, assist, and store personal or professional financial data. It stores, analyzes, manages, and processes a set of financial transactions, records, and processes. Financial software is built on a foundation of financial information management. It can run independently of other software or as part of a financial information system (IS).
