Space Electronics Global Market Report 2023 –  
Market Size, Trends, And Global Forecast 2023-2032

The Business Research Company's "Space Electronics Global Market Report 2023" is a comprehensive source of information that covers every facet of the space electronics global market. As per TBRC's [space electronics global market forecast](#), the space electronics global market size is expected to grow to \$3.21 billion in 2027 at a CAGR of 6.6%.

“

The Business Research Company's global market reports are now updated with the latest market sizing information for the year 2023 and forecasted to 2032”

*The Business Research  
Company*

The growth in the space electronics global market is due to increase in number of satellites. North America region is expected to hold the largest space electronics global market share. Major players in the space electronics global market include BAE Systems PLC, Microsemi Corporation, Texas Instruments Inc., Xilinx Inc., Cobham Limited.

## [Space Electronics Global Market Segments](#)

- By Type: Radiation Hardened, Radiation Tolerant
- By Component: Microprocessors And Controllers, Sensors, Application-Specific Integrated Circuits; Memory Chips, Power Source Cables, Discrete Semiconductors, Other Components
- By Platform: Satellite, Launch Vehicles, Deep Space Probes
- By Application: Communication, Earth Observation, Navigation, Global Positioning System (GPS), Technology Development And Education, Other Applications

- By Geography: The global space electronics global market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.
