*The report "Raynauds Disease Market, By Drug Class , By Distribution Channel and By Region - Market Trends, Analysis, and Forecast till 2030"*

COVINA, CALIFORNIA, UNITED STATE, March 31, 2023 /EINPresswire.com/ -- Raynaud's phenomenon is a condition in which blood vessels narrow due to cold or stress, resulting in primary or secondary Raynaud's phenomenon. The human body is adaptable to its surroundings. In a chilly climate, the body conserves heat by delaying the blood supply to the skin, causing blood

vessels to constrict. In the presence of Raynaud's phenomenon, the body's reaction to stress or cold is stronger than usual, which can lead to an attack with blood vessel constriction and tightening. During an attack, the colour of fingers and toes changes from white to blue to red, combined with a chilly and numb sensation. With the end of the episode, blood flow returns to normal, causing throbbing and tingling in the fingers and toes.

The report "Raynauds Disease Market, By Drug Class (Beta-Blockers, Prolactin inhibitors, Calcineurin inhibitors, Antibiotics / Antineoplastics, Antimigraine agents, Antirheumatics, Antianginal agents, Vasodilators), By Distribution Channel (Hospital Pharmacies, Retail Pharmacies, Drug Store, E-Commerce) and By Region (North America, Europe, Asia Pacific, Latin America, and Middle East & Africa) - Market Trends, Analysis, and Forecast till 2030"

## Key Highlights:

- In 2021, The US Food and Drug Administration has approved Dyanavel XR (amphetamine), extended release once-daily tablets, CII, for the treatment of Attention-Deficit Hyperactivity Disorder (ADHD) in patients aged 6 and above, according to Tris Pharma, Inc. (Tris).

## Analyst View:

The increase in R&D by various research and academic institutions, as well as biopharmaceutical businesses, points to the development of novel treatment techniques, which will contribute to the expansion of the global Raynaud's phenomenon management market. Raynaud's phenomenon is affected by gender, country, and workplace, all of which have an impact on the regional market. The market has also risen as a result of public awareness campaigns established by the healthcare industry and the government. Lack of professional knowledge, illiteracy, and lack of understanding of the syndrome are some of the reasons limiting the global growth of the Raynaud's phenomenon management market.

Questions answered by Raynauds Disease Market:

1. What are the key factors driving the growth of the Raynaud's disease market, such as increasing awareness, better diagnosis, and new treatment options?

The key factors driving the growth of the Raynaud's disease market include increasing awareness of the disease among patients and healthcare providers, improved diagnosis and screening methods, and the development of new treatment options such as vasodilators, calcium channel blockers, and prostaglandins. Additionally, the rising prevalence of Raynaud's disease, especially in colder climates, is contributing to the growth of the market.

2. What are the opportunities for companies in the Raynaud's disease market, such as expanding into new geographic regions or developing combination therapies?

Opportunities for companies in the Raynaud's disease market include expanding into new geographic regions where the disease is prevalent but underdiagnosed or undertreated, developing combination therapies that target different aspects of the disease pathophysiology, and investing in research and development to improve understanding of the disease and develop new treatment options. Additionally, partnerships with patient advocacy groups and healthcare providers can help raise awareness of the disease and improve patient access to treatment.

3. How does the competitive landscape of the Raynaud's disease market compare to other related markets, such as systemic sclerosis or primary pulmonary hypertension?

The competitive landscape of the Raynaud's disease market is relatively less crowded compared to other related markets such as systemic sclerosis or primary pulmonary hypertension. Systemic sclerosis and pulmonary hypertension are more severe conditions and have a larger patient population, leading to a more competitive market with a greater number of approved therapies. However, there is still significant room for growth and innovation in the Raynaud's disease market, particularly as more research is conducted and new treatment options are developed.
