

Alum Prices Today, Price Chart and Forecast Analysis Provided by Procurement Resource

Procurement Resource does an in-depth analysis of the price trend to bring forth the monthly, half-yearly, and yearly information on the Alum price.

SHERIDAN, WYOMING, UNITED STATES,
April 1, 2023 /EINPresswire.com/ --

Product Name - Alum

HS Code - 283330

Molecular Weight - 258.21g/mol

Chemical Formula $KAl(SO_4)_2$ or
AlK08S2

Synonyms - Aluminium potassium sulfate, Potassium alum, Potash alum, Aluminium potassium bis(sulphate)

Currency - US\$ (Data can also be provided in local currency)

Customization Scope - The report can be customized as per the requirements of the customer

Post-Sale Analyst Support - 360-degree analyst support after service delivery

Alum Price Trend

Region/Countries for which Data is available

Asia Pacific: China, India, Indonesia, Pakistan, Bangladesh, Japan, Philippines, Vietnam, Iran, Thailand, South Korea, Iraq, Saudi Arabia, Malaysia, Nepal, Taiwan, Sri Lanka, UAE, Israel, Hongkong, Singapore, Oman, Kuwait, Qatar, Australia, and New Zealand

Europe: Germany, France, United Kingdom, Italy, Spain, Russia, Turkey, Netherlands, Poland, Sweden, Belgium, Austria, Ireland Switzerland, Norway, Denmark, Romania, Finland, Czech Republic, Portugal and Greece,

North America: United States and Canada

Latin America: Brazil, Mexico, Argentina, Columbia, Chile, Ecuador, and Peru

Africa: South Africa, Nigeria, Egypt, Algeria, Morocco

Alum is aluminium's hydrated double sulfate salt consisting of one X cation. Alum occurs naturally as a crystalline stone that has been in use since ancient times owing to its healing properties since it is both antiseptic and astringent. It is occasionally available in a crystalline form; however, it is usually in the powder form.

The cation can be swapped by several other elements based on the properties that Alum changes. Of all Alums, aluminium potassium sulfate is the most common, in which a Potassium ion replaces the X cation. Aluminium sulfate has the ability to form various alums with sulfates that have single-charged cations of potassium, ammonium, sodium, caesium, and other such elements and compounds.

Alums of ammonium aluminium sulfate, potassium aluminium sulfate, and sodium aluminium sulfate are the most essential alums.

The leading countries accounting for the most alum production are Guinea, Australia, Indonesia, Brazil, and China.

Key Details About the [Alum Price](#) Trend:

Procurement Resource does an in-depth analysis of the price trend to bring forth the monthly, quarterly, half-yearly, and yearly information on the Alum price in its latest pricing dashboard. The detailed assessment deeply explores the facts about the product, price change over the weeks, months, and years, key players, industrial uses, and drivers propelling the market and price trends.

Each price record is linked to an easy-to-use graphing device dated back to 2014, which offers a series of functionalities; customization of price currencies and units and downloading of price information as excel files that can be used offline.

The Alum price chart, pricing database, and analysis can prove valuable for the procurement managers, directors, and decision-makers to build up their strongly backed up strategic insights to attain progress and profitability in the business.
