Enlitic to Showcase Data Management Solutions at HIMSS 2023

Enlitic unlocks the power of your data with revolutionary, AI - powered tools

FORT COLLINS, CO, UNITED STATES, April 13, 2023 /EINPresswire.com/ -- Enlitic, a leading provider of Artificial Intelligence (AI) enabled data management solutions, has announced its presence at HIMSS 2023 in Chicago from April 17-21. The company will be demonstrating its cutting-edge solutions, Curie|ENDEX™ and Curie|ENCOG™, which are designed to help healthcare providers optimize clinical workflows, increase efficiencies, and expand capacity while ensuring data accuracy, reliability, and privacy, all with a guaranteed ROI. Data management is critical to healthcare providers because it

Enlitic Launches Enlitic Curie 1.3

Reimagined Healthcare Requires Reimagined Intelligence

facilitates efficient management of patient information to leverage it for better patient care and clinical operations. The vast amount of data, including patient records, medical images, and diagnostic results collected by providers can be organized, managed, and protected with the Enlitic Curie™ real-world evidence platform.

> "HIMSS is an important show for providers to experience our latest release of data management tools and understand how AI has the power to solve decades old challenges"
>
> *John Marshall, CRO Enlitic*

Curie|ENDEX™ is an AI-powered technology that standardizes patient data to a universal ontology. It drives improved data quality, streamlined clinical workflows, data governance, interoperability, clinical research, and facilitates compliance. By standardizing patient data, healthcare providers can optimize their workflows and increase efficiencies while ensuring data is accurate and reliable.

Curie|ENCOG™ is an AI-enabled data anonymization technology that protects patient privacy, enabling research, supporting compliance, minimizing the impact of data breaches, and improving data privacy. Anonymization ensures providers are using patient data in a responsible and ethical manner while still optimizing patient care and advancing medical knowledge.

Enlitic's presence at HIMSS 2023 is an opportunity for healthcare professionals to experience the benefits of AI-enabled solutions in data management. Enlitic's real-world evidence platform delivers on all the promises that healthcare vendors and providers are driving towards, leveraging the power of AI to standardize patient data, protect patient privacy, and ensure data accuracy and reliability, thereby optimizing clinical workflows and increasing efficiencies.

When an organization uses the Enlitic platform, data monetization strategies can be implemented and bring a higher return. Data is clean, accurate and searchable while protected health information is removed and validated each step of the way without removing clinical relevance.

Visit Enlitic's booth at HIMSS 2023 to witness how the company's data management solutions can help healthcare providers streamline their workflows, improve efficiency, and expand capacity while ensuring data accuracy, reliability, and privacy.
