Surge in adoption of cloud-based technologies and integration of AI-Enabled tools with ITSM solutions drive the global cloud ITSM market. However, security and privacy concerns related to confidential data and business processes hinder the market growth. On the other hand, widespread adoption of BYOD trend, rise in mobile workforce, and increase in demand among SMEs create new opportunities in coming years.

The global cloud IT service management market is segmented on the basis of component, organization size, industry vertical, and region. By component, the market is bifurcated into solutions and services. By organization size, the market is divided into large enterprises and small & medium enterprises. By industry vertical, the market is classified into IT & telecommunication, BFSI, healthcare, manufacturing, retail, education, and others. By region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Based on industry vertical, the IT & telecommunications segment held the largest share of the global cloud ITSM market, accounting for more than one-third of the total market in 2018, and is expected to maintain its leadership status during the forecast period. This is attributed to ITSM solutions offering numerous benefits such as lowered operating costs, rise in revenues, infrastructure sharing, and others.

Based on component, the solution segment contributed to nearly two-thirds of the total share of the global cloud ITSM market in 2018, and is expected to maintain its dominance during the forecast period. This is due to rise in need to manage IT operations and management in order to design, operate, plan, deliver, and control cloud and IT services.
