

Glitter Acrylic Sheet Provides Decorative Elements for Jewelry, Displays

Interstate Advanced Materials expands its selection of acrylic products for designers and crafters with glitter cast acrylic sheet.

SACRAMENTO, CA, UNITED STATES, April 6, 2023 /EINPresswire.com/ -- Jewelry makers, hobbyists, crafters, and display designers are always on the lookout for aesthetically pleasing materials that could serve as inspiration for their next project or help put the finishing touches on their current one. One such material is [acrylic plastic](#), which has long been a favorite of hobby enthusiasts and designers – from the many available colors of cast acrylic sheet to acrylic mirrors, acrylic is a popular material for creating durable and attractive products and displays. To provide more choice for designers and crafters, Interstate Advanced Materials expands its selection of acrylic products with glitter cast acrylic sheet.

Glitter acrylic sheets are made from a combination of glitter particles and clear cast acrylic sheet.

“

Glitter acrylic sheet is easily formed and fabricated - it may be laser cut, glued, and hot air welded into jewelry and custom parts for crafts and displays.”

Christopher Isar

[Glitter acrylic sheet](#) is made from a combination of clear cast acrylic and glitter particles. The result is a mostly opaque, colorful sheet with the eye-catching look of glitter that shares many of the same properties as cast acrylic. Glitter acrylic is UV resistant and can weather exposure to sunlight for prolonged periods of time. Like cast acrylic, it's also rigid and more impact resistant than glass, making it a good design choice for displays or installations in populated areas that see high traffic. Glitter acrylic sheet is easily formed and fabricated - it may be laser cut, glued,

and hot air welded into jewelry and custom parts for crafts and displays.

The applications for glitter acrylic sheet are limited only by the imagination. In addition to jewelry and point-of-purchase displays, glitter acrylic is used as a decorative elements of furniture, signage, artistic window panes, and more.

Interstate Advanced Materials carries seven different colors of glitter acrylic, with pre-cut sizes and custom cut-to-size options available.
