Global Organic Fertilizer Market

Organic fertilizer is a type of fertilizer made from natural, organic materials such as animal manure, plant residues, and compost. Unlike synthetic fertilizers, which are made from chemicals and minerals, organic fertilizers provide nutrients to plants in a natural way, improving soil health and promoting sustainable agriculture. Organic fertilizers release nutrients slowly over time, allowing plants to absorb them at a more natural pace, and can improve soil structure, water retention, and microbial activity. Organic fertilizers are considered an environmentally friendly alternative to synthetic fertilizers, as they do not contribute to soil degradation or water pollution.
