SCM-T Announces Value Added Resale (VAR) Agreement with AbeTech for SupplyLinQ™ Technology

An Innovative Process Management Technologies Company

SOMERSET, NEW JERSEY, UNITED STATES, April 3, 2023 /EINPresswire.com/ -- SCM-T ANNOUNCES VALUE ADDED RESALE (VAR) AGREEMENT WITH ABETECH FOR SUPPLYLINQ™ TECHNOLOGY

AbeTech, a national mobile computing, asset tracking, and automation solution provider, partners with SCM-T, an IIoT-enabled asset management, and supply chain software technology company, to deliver comprehensive supply chain management capabilities.

AbeTech's comprehensive solution will combine Zebra IIoT technology and AbeTech deployment and support expertise with SCM-T software technologies.

Customer value will include operational automation and management, increased process accuracy, and overall reduction of operational costs.

SCM Technologies LLC (SCM-T), an innovative asset management and supply chain software technology provider, and Abraham Technical Services, Inc. (AbeTech), a solutions provider of intelligent automation technologies, have reached an agreement for AbeTech to utilize and resell SCM-T's SupplyLinQ™ software application suite and platform.

To achieve supply chain operational efficiency and management, customers require three core capabilities:

• Automation: Process automation reduces human error and increases efficiency within the supply chain.

• Transparency: Data and information transparency between various systems and staff is required for effective management.

• Intelligence: Operational intelligence and analytics are the cornerstones for decision-making, projections, and improvements

Focusing on the supply chain management capabilities across industries such as manufacturing, retail, and agricultural, AbeTech plans to provide comprehensive enterprise solutions to value-added operations at the shop floor level. This includes operations such as:

• Item shipping and validation management
• Item receiving and validation management
• Item inventory management
• Item movement management (e.g., picking and put-away)

SCM-T President, Bryan Boutté, said, "Our goal is to provide Automation, Transparency, and Intelligence to the supply chain industry segment, Working with a leading solution provided such as AbeTech, offers the market with a complete environment consisting of IIoT software, hardware, and services."

AbeTech CRO, Rick Segal, said "Our clients require more than item track and trace. They require automation and operational controls. Leveraging SCM-T's SupplyLinQ™ technologies, AbeTech can bring enormous value to our clients faster."

About SCM Technologies, LLC (SCM-T)

SCM Technologies, LLC (SCM-T), based in Somerset, New Jersey, is an enterprise software technologies company providing asset management and supply chain software and SaaS environments.

The company's products and services work with industry-leading IIoT hardware and software, blockchain and data analysis systems, ERP and WMS systems, and multiple auto-ID and sensor technologies.

SCM-T technologies are the cornerstone of providing operational automation, transparency, and intelligence and are focused on advancing a customer's supply chain capabilities. SCM-T products provide capabilities such as Item Tracking, Workflow Processing, Task Management, Event Management, and Comprehensive Analytics across a growing number of industries. SCM-T works through Value-Added Resellers that primarily target manufacturing, warehousing, logistics, automotive, agriculture, food and beverage, retail, and other industries. www.scm-t.com
