

# As-Built Services by DCMS Network Offers Innovative Technology to Solve Complex Building Challenges

*Modernize Your Building Infrastructure with As-Built Services from DCMS Network in Miami*

MIAMI, FL, UNITED STATES, April 3, 2023

/EINPresswire.com/ -- The construction industry is constantly changing and evolving. Buildings are becoming increasingly complex and to keep up with an evergrowing world full of technological advances, businesses must be willing to embrace change themselves - especially when it comes to the construction industry.

DCMS Network is a coast-to-coast As-Built services provider for commercial and residential properties, offering innovative technologies that solve the most complex building challenges by utilizing the latest 3D scanning, and [BIM](#) (Building Information Modeling) software available today. With the main headquarters in Miami, the company's team of experts delivers comprehensive As-built documentation for existing structures, giving clients an unprecedented level of understanding about the facility's layout, features, and functionality. This advanced technology allows building structure owners to visualize and thoroughly understand the structure to be worked on in a new way, making it easier to identify potential problems and solutions, therefore, allowing clients to make more informed decisions about the building structure.

Businesses are using as-built services to quickly and accurately capture the existing conditions of a facility or structure. This allows companies to make informed decisions when planning renovations, expansions, or other projects. Additionally, many businesses are utilizing 3D services such as scanning and modeling to visualize spaces, enabling better communication and collaboration when planning new structures. This helps businesses save time and money by avoiding costly mistakes. Furthermore, as-built services are becoming increasingly important for

safety purposes, helping companies stay compliant with industry regulations and standards.

As-built services help streamline the project planning process from start to finish, allowing businesses to go from drafting initial plans to final implementation of the project more quickly and efficiently. Additionally, as-built services are invaluable for monitoring the progress of a project over time, ensuring that all stakeholders involved have an up-to-date understanding of the project's current state. This allows businesses to make necessary adjustments throughout the lifetime of a project and avoid costly surprises down the line.

In short, as-built services are becoming an invaluable tool for many businesses, providing them with the accuracy and detail they need to ensure successful project planning and implementation. From monitoring progress to staying compliant with industry regulations, as-built services offer a comprehensive solution that helps businesses remain competitive in today's ever-changing landscape.

DCMS Network's As-Built services provide construction and engineering teams with the accurate data needed to successfully plan, manage, and implement complex projects. With available 3D scanning technology and BIM software, clients can gain a better understanding of the current facility's layout, features, and functionality to identify potential problems before becoming costly mistakes. By staying compliant with industry regulations through as-built documentation, businesses will remain competitive in today's ever-changing market.
