The global market for trailer surge brake is severely impacted by the outbreak of the COVID-19 pandemic.

The COVID-19 pandemic saw a decline in the economic growth in almost all the major countries, thus affecting consumer spending patterns.

Owing to the lockdown implemented across various countries, national and international transport have been hampered, which has significantly impacted the supply chain of numerous industries across the globe, thereby increasing the supply-demand gap.

Thus, insufficiency in raw material supply is expected to hamper the production rate of trailer surge brakes, which negatively impact the market growth.

However, this situation is expected to improve as government has started relaxing norms around the world for resuming business activities.
