#### Recent Developments:

The COVID-19 pandemic has led to a surge in demand for wet tissues and wipes, particularly those with disinfectant properties.

Many companies in the wet tissues and wipes market are investing in research and development to create more eco-friendly and sustainable products.

The introduction of new fragrances and formulations, such as those with natural ingredients and essential oils, is a key trend in the market.

In 2020, Procter & Gamble announced the launch of its new line of eco-friendly wipes under the brand name "FABRIC," which are made from 100% plant-based fibers and are biodegradable.

Kimberly-Clark, one of the largest players in the wet tissues and wipes market, has launched a new line of flushable wipes designed for use in septic systems.

#### FAQs:

##### 1. What are wet tissues and wipes?

Wet tissues and wipes are disposable products made from non-woven fabrics that are pre-moistened with a liquid solution, such as water, alcohol, or other cleaning agents. They are used for a variety of purposes, including personal hygiene, cleaning surfaces, and disinfecting.

##### 2. What are some common uses for wet tissues and wipes?

Wet tissues and wipes are commonly used for personal hygiene, including cleaning hands and faces, wiping up spills and messes, and disinfecting surfaces.

##### 3. Are wet tissues and wipes environmentally friendly?

Many wet tissues and wipes are not environmentally friendly, as they are single-use products that contribute to waste. However, there are an increasing number of eco-friendly and biodegradable options available on the market.

#### 4. Are wet tissues and wipes safe for sensitive skin?

It depends on the specific product and formulation. Some wet tissues and wipes are designed for sensitive skin and are free of harsh chemicals and fragrances, while others may cause irritation.
