Solar Energy Tower Market

The solar energy tower market is a type of solar power plant that utilizes a central tower to concentrate solar energy and produce electricity. This technology is also known as either a solar power tower or solar thermal power plant.

The solar energy tower works by using mirrors or lenses to focus sunlight onto a central receiver, which contains heat transfer fluid. When heated by the concentrated sunlight, this fluid generates steam which drives a turbine and generates electricity. Typically, the tower is encircled by mirrors or lenses which track the movement of the sun and reflect it onto its central receiver.
