

At A CAGR of 6.3%, Hearing Aids Market Size To Reach USD 8,967.7 Million by 2027 | Emergen Research

Hearing Aids Market Size To Grow At USD 5,480.1 Million in 2019, Market Growth - CAGR of 6.3%, Market Trends –Rising geriatric population

VANCOUVER, BRITISH COLUMBIA, CANADA, April 5, 2023

/EINPresswire.com/ -- The Latest research study released by Emergen Research on "[Hearing Aids Market](#)" with 150+ pages of analysis on business Strategy taken up by key and emerging industry players and delivers know how of the current market development, landscape, technologies, drivers, opportunities, market viewpoint and status. Understanding the segments helps in identifying the importance of different factors that leads the market growth.

“

The government's support for improving the life of hearing-impaired individuals is one of the significant factors influencing the market growth.”

Emergen Research

The global hearing aids market is expected to reach USD 8,967.7 Million by 2027, according to a new report by Emergen Research. The hearing aids market is experiencing a rapid growth attributable to the increasing application of behind-the-ear, receiver in-the-ear, in-the-ear, and canal hearing aids, as well as cochlear implants, among others, in the adults and pediatrics. Innovative technological developments in hearing aids are crucial to fuel market demand. For instance, hearing-impaired individuals are considered to be 300.0% more prone to

falling, and the technology, developed by Starkey, on the occurrence of a fall would automatically send alerts to three emergency contact notifying them about the fall, as well the precise location of the hearing-impaired individual. Besides, there are technologies that can detect and generate sound alerts to indicate that the person is on the verge of falling.

Some Key Highlights from the Report

By type, canal hearing aids are estimated to witness the fastest growth rate of 7.8% in the forecast period. Canal hearing aids have a less likely chance to overwhelm listeners with feedback, and blocking of the ear canal is less of a problem, thus mitigating the occlusion effect.

By hearing loss, sensorineural hearing loss held a substantial market share in 2019.

Sensorineural hearing loss (SNHL) occurs post damage to the inner ear. It may also occur owing

to nerve pathways problems from the inner ear to the brain. SNHL may cause difficulty in the hearing of soft sound and even louder sounds.

By application, pediatrics are estimated to observe a CAGR of 4.6% in the forecast period, as the amplification of sound stimulates and promotes the growth of the brain's auditory centers, thereby assisting in a child's critical learning.

Market Segmentation Analysis

Players can concentrate on high-growth regions and, if necessary, modify their business plan according to the research report. The Hearing Aids Market is divided into a variety of categories, uses, and geographical areas. Players gain from the report's regional segmentation research since it offers pertinent data and insights into important geographic marketplaces.

Type Outlook (Revenue, USD Billion; 2017-2027)

Behind-the-ear Hearing Aids

Receiver in-the-ear Hearing Aids

In-the-ear Hearing Aids

Canal Hearing Aids

Others

Hearing Loss Outlook (Revenue, USD Billion; 2017-2027)

Sensorineural Hearing Loss

Conductive Hearing Loss

COVID-19 Impact Analysis

The post-COVID-19 phase has undergone substantial change, and Hearing Aids Market research highlights the opportunities and difficulties that still exist. This study report thoroughly examines the effects of the COVID-19 pandemic on the global economy and post-pandemic market behaviour.
