

# With CAGR of 12.4%, Molecular Diagnostics Market Size To Reach USD 57.05 Billion in 2030

*Molecular Diagnostics Market Trends – Changing technological landscape in diagnostics is driving demand for molecular diagnostics*

VANCOUVER, BRITISH COLUMBIA, CANADA, April 5, 2023

/EINPresswire.com/ -- The Latest research study released by Emergen Research on "[Molecular Diagnostics Market](#)" with 150+ pages of analysis on business Strategy taken up by key and emerging industry players and delivers know how of the current market

development, landscape, technologies, drivers, opportunities, market viewpoint and status. Understanding the segments helps in identifying the importance of different factors that leads the market growth.

“

Increasing prevalence of infectious diseases and rising usage of POC diagnostic tests are key factors driving market revenue growth”

*Emergen Research*

The global molecular diagnostics market size was USD 19.86 Billion in 2021 and is expected to register a revenue CAGR of 12.4% during the forecast period, according to the latest analysis by Emergen Research. Rise in prevalence of infectious diseases and increased use of point-of-care diagnostic tests are some of the key factors driving market revenue growth. Point-of-Care (PoC) diagnostic testing technologies offer various benefits over traditional diagnostic procedures including better prices, improved efficiency, and potential to provide quick data for decision-

making. In addition, increasing use of Point-of-Care (POC) diagnostics testing equipment is being driven by need to make healthcare more patient-centered by organizing medical services around the patient rather than practitioner. Several patients find testing inconvenient as testing process is usually separate from consultation.

Key Players Included in this report are:

Becton, Dickinson and Company, Abbott Laboratories, Agilent Technologies, Danaher Corporation, bioMérieux SA, Hologic, Inc., Illumina, Inc., Roche Diagnostics, Siemens Healthcare Private Limited, and Diasorin.

Molecular Diagnostics Market, By Product & Services (Reagent, Instrument, Software & Service), By Technology (Polymerase Chain Reaction), By Application, By End-Use, By Test Location, and By Region Forecast to 2030

Some Key Highlights from the Report

By product & service, the reagent & kits segment accounted for largest revenue share in 2021 owing to high popularity of these items by end-use to their regular use.

By technology, the Polymerase Chain Reaction (PCR) segment accounted for largest revenue share in 2021. This may be ascribed to increased use of PCR in proteomics and genomics, as well as use of RT-PCR in COVID-19 test, PCR equipment automation, and advent of sophisticated technologies such as qRT-PCR.

What can be explored with the Molecular Diagnostics Market Study?

Gain Market Understanding

Identify Growth Opportunities

Analyze and Measure the Global Molecular Diagnostics Market by Identifying Investment across various Industry Verticals

Understand the Trends that will drive Future Changes in Molecular Diagnostics Market

Understand the Competitive Scenarios

Track Right Markets

Identify the Right Verticals

Quick Buy Molecular Diagnostics Market

## Market Segmentation Analysis

Players can concentrate on high-growth regions and, if necessary, modify their business plan according to the research report. The Molecular Diagnostics Market is divided into a variety of categories, uses, and geographical areas. Players gain from the report's regional segmentation research since it offers pertinent data and insights into important geographic marketplaces.

Product Outlook (Volume: Kilo Tons) (Revenue, USD Billion; 2017-2027)

Reagents

Instruments

Others

Technology Outlook (Volume: Kilo Tons) (Revenue, USD Billion; 2017-2027)

DNA Sequencing and NGS

Polymerase Chain Reaction (PCR)

In Situ Hybridization

DNA Microarrays

Isothermal Nucleic Acid Amplification Technology (INAAT)

Other technologies

COVID-19 Impact Analysis

The post-COVID-19 phase has undergone substantial change, and Molecular Diagnostics Market research highlights the opportunities and difficulties that still exist. This study report thoroughly examines the effects of the COVID-19 pandemic on the global economy and post-pandemic market behaviour.

## Regional Outlook

We carefully examined each division, regional classification, national study, and subject-specific data set during the market research. This Molecular Diagnostics Market research report's goal is to look at growth patterns, promising futures, important obstacles, and expected results. Information on significant market participants, strategic alliances, plans, new product launches, and joint ventures are all included in the research.

## Key Reasons to Purchase Molecular Diagnostics Market Report

The reader will be in a position to comprehend and react to marketing strategies like using strengths and conducting a SWOT analysis.

The research looks into the dynamics of the target market and how the conflict between Russia and Ukraine has affected it.

About Us:

Emergen Research is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyse consumer behavior shifts across demographics, across industries, and help clients make smarter business decisions. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Types, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trends existent in the market. Emergen Research has a strong base of experienced analysts from varied areas of expertise. Our

industry experience and ability to develop a concrete solution to any research problems provides our clients with the ability to secure an edge over their respective competitors.
