Major Companies and Competitive Landscape:

- Thermo Fisher Scientific Inc.
- Julabo GmbH
- LAUDA-Brinkmann LP
- Lytron Inc.
- · Huber USA Inc.
- Fractional Research Inc.
- Neslab Instruments Inc.
- Buchi Labortechnik AG

- · Cooling Technology Inc.
- Bruker Corporation

As the approaches the third decade of the twenty-first century, the building industry has begun to shift toward prefabrication and other manufacturing processes, not only to avoid labour shortages but also to build faster, more efficiently, and with less materials.

The world is on the verge of entering the Fourth Industrial Revolution. Prefabrication, generative design, and virtual reality—along with robotics, reality capture, and 3D printing—will alter the architecture, engineering, and construction sectors throughout that age, enabling for much faster and safer building construction while also saving significant money.

Segments covered by Type Outlook, End-Use Outlook, Regional Outlook

By Type Outlook

- Air-Cooled
- Water-Cooled
- By End-Use Outlook
- Industrial
- Medical
- Scientific Research
- Others

Regional scope

- North America
- Europe
- Asia Pacific
- Latin America
- Middle East & Africa

Rising demand for advanced construction materials to drive market growth

The October 2017 wildfires in Northern California, which damaged thousands of homes, may serve as an impetus for further use of prefabricated dwellings. Long wait times for residents wanting to rebuild have resulted from a limited labor market and the state's rigorous building rules. Startups such as Connect Homes and Acre Designs have stepped in to fill the gap, producing construction supplies and allowing consumers to create smart, energy-efficient homes in a fraction of the time and with less effort.

Research Methodology:

The report employs a top-down and bottom-up approach to provide clear understanding of the market growth. The report has been formulated through extensive primary and secondary research with data further validated and verified from industry experts and professionals. The report also offers SWOT analysis and Porter's Five Forces analysis to offer better insights into the Recirculating Chillers market growth.

Key Questions in the Report:

- Which region is expected to dominate the market over the coming years?
- Which application or end user segment is anticipated to show significant growth over the projected timeline?
- What is the impact of the COVID-19 pandemic on the overall market growth?
- · What are the macro and micro economic factors influencing the growth of the market?
- What are the recent R&D and technological advancements in the Recirculating Chillers market?
