

HVAC Filters Market Research Report Including SWOT Analysis, Global Industry Outlook and Key Players Analysis By 2027

Rising demand among consumers to improve home air quality is driving the global HVAC filters market.

VANCOUVER, BC, CANADA, April 5, 2023 /EINPresswire.com/ -- The latest research report by Emergen Research, named 'Global [HVAC Filters Market - Forecast to 2027](#)', entails a comprehensive review of the global HVAC Filters market's present and future trends. The study compiles useful data on the most well-known market participants, sales and

distribution channels, regional spectrum, anticipated market share and size, and revenue projections for the anticipated period. The global economy is under attack from the health crisis, which has disrupted the operation of this specific industry. The market intelligence study examines the global market share, projected growth rate, anticipated market trends, entry-level

“

Market Size – USD 5.39 Billion in 2019, Market Growth – at a CAGR of 5.2%, Market Trend – Increasing usage of HEPA filters”

Emergen Research

obstacles, fundamental market drivers, restraints, challenges, and opportunities in greater detail. The report clearly defines the HVAC Filters market position on a global level. The detailed insights into the market's geographical spectrum offered by the report make it an excellent source of knowledge about the HVAC Filters industry. The research includes a thorough examination of this industry and concentrates on the market's overall compensation over the anticipated time frame.

The global Heating, ventilation, and air conditioning (HVAC) filters market is likely to reach value of USD 7.89 Billion by 2027, according to a current analysis by Emergen Research. This growth of the market can be attributed to the increasing awareness among people regarding deterioration of indoor air quality. Moreover, the rising need to reduce excessive dirt and debris built up in

HVAC systems causing early system failure and expensive repairs is also boosting the demand for HVAC filters. Increasing research and development activities for production of high-efficiency HVAC filters, which can reduce allergens and dust, are also augmenting the market for HVAC filters. High-efficiency particulate air (HEPA) filters are increasingly utilized in residential and commercial sectors, as they can easily trap airborne particles such as dust, mites, mold spores, pollen, and pet dander, in the air inside homes. Smokers, pet owners, asthma sufferers, and new-generation parents are increasingly adopting HEPA filters, as they can remove even the tiniest airborne particles.

Leading companies profiled in the report:

Camfil, 3M Company, Mann+Hummel, Parker-Hannifin Corporation, American Air Filter Company, Inc., Ahlstrom-Munksjö, Donaldson Company, Filtration Group Corporation, Sogefi Group, Freudenberg Group

The report closely studies the growth trajectory of the global HVAC Filters market. It brings to light the global dominance of the leading regional segments, including North America, Asia Pacific, Europe, Latin America, and the Middle East & Africa.

The study elaborates on the crucial information pertaining to the regional market share. It simultaneously focuses on the significant details about the growth patterns of each regional market.

Moreover, the report encases an exhaustive geographical study of the market, emphasizing the business growth prospects and market barriers for each of the key market regions.

Key Highlights of Report

In April 2020, Camfil Svenska AB, an air filter company, announced that the company had acquired Resema AB, its fellow Sweden-based filter company, and Resema A/S, its Denmark-based sister company. The acquisition is expected to strengthen the company's position in the air filtration industry in the Nordic region.

The HEPA segment held the largest market share of 49.9% in 2019. Increasing prevalence of asthma among people is driving the demand for HEPA air purifiers, as they remove common household allergens such as mite feces, mold spores, and household dust particles.

The synthetic polymer segment is anticipated to expand at the most rapid CAGR of 5.8% during the forecast period. High mechanical resistance of synthetic polymers reduces the chances of contamination of filtered air by fibers or gases coming from the filter material itself. This factor is driving the segment.

The building & construction segment accounted for the largest share of the HVAC filters market in 2019. New residential construction projects have increased the adoption of HVAC systems and air filters.

This report is the latest document encompassing the massive changes that took place in the HVAC Filters market following the emergence. The pandemic has drastically affected the global economic landscape, thereby disrupting the operating mechanism of the HVAC Filters market. The severe global crisis has prompted organizations to efficiently respond to the rapidly shifting business environment.

Technology Outlook (Volume: kilo Tons) (Revenue, USD Billion; 2017–2027)
Electrostatic Precipitators

HEPA

Activated Carbon

Others (Ionic Filtration and UV Filtration)

Material Outlook (Volume: Kilo Tons) (Revenue, USD Billion; 2017–2027)
Carbon

Fiberglass

Metal

Synthetic Polymer

End-user Outlook (Volume: Kilo Tons) (Revenue, USD Billion; 2017–2027)
Pharmaceutical

Automotive

Building & Construction

Food & Beverage

Others

Unfolding the prime factors prompting global market growth:

The study offers an in-depth analysis of the product outlook, which depicts the latest production growth trends and profit valuation. It further fragments the global HVAC Filters market into a broad product spectrum.

The study covers essential data related to these products' application landscape, the demand for and market share held by each application type, and their growth rate analysis over the estimated period.

A detailed description of the distribution channels, including distributors, producers, and buyers, is one of the report's key market highlights.

Elucidating the competitive landscape of the Global HVAC Filters Market:

The global HVAC Filters market report offers viable insights into the competitive spectrum of the HVAC Filters business sphere.

The report systematically profiles the company information of each market player.

It identifies the estimated industry share, production facilities, development prospects, and geographies served by each market player.

The study showcases the extensive product portfolios of the prominent market contenders.

It offers critical data & information about the product application scope and the end-user landscape.

The study provides salient information about the pricing models of the products offered by these companies. Moreover, it determines the gross profits and losses experienced by them throughout their market tenures.

About Us:

Emergen Research is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyses consumer behavior shifts across demographics, across industries, and help clients make smarter business decisions. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Types, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trends existent in the market. Emergen Research has a strong base of experienced analysts from varied areas of expertise. Our industry experience and ability to develop a concrete solution to any research problems provides our clients with the ability to secure an edge over their respective competitors.
