

Top 9 Largest Fertilizer Companies in World - IMARC Group

The top manufacturers in the fertilizer market are leveraging advanced tools in the production stage to improve nutrient efficiency.

SHERIDAN, WYOMING, UNITED STATES, April 6, 2023 /EINPresswire.com/ --

Fertilizers represent chemical agents that are added to the soil to enhance the growth of plants and increase crop yield. They consist of several organic and inorganic substances, agricultural wastes, compost, animal manure, and humic substances (HS) produced by microorganisms. Fertilizers improve soil structure, impart positive effects on the physiology of plants, neutralize acidic and alkaline soil, etc. They are soluble in water and can be easily absorbed by plants via numerous physiological processes.

Top 9 Largest Fertilizer Companies in World 2022-2027

Fertilizers improve soil structure, impart positive effects on the physiology of plants, neutralize acidic and alkaline soil, etc. They are soluble in water and can be easily absorbed by plants via numerous physiological processes.

Fertilizers help plants in conducting amino acid synthesis and photosynthesis and boosting cell growth. They increase the water-holding capacity of plants and facilitate the development of strong roots. Fertilizers improve the disease-resistance ability of plants and retain the basic functioning of various essential biochemical procedures. They also prevent complications caused by nutrient deficiency in plants, including necrosis, chlorosis, premature falling of leaves, delay in flowering, cell division inhibition, etc. Fertilizers enhance the quality of crops to produce better harvests.

The increasing adoption of organic farming to produce good quality crops and avoid the usage of artificial ingredients, pesticides, hormones, and antibiotics is primarily driving the fertilizer market. Additionally, the growing consumer awareness towards contamination of water bodies and the destruction of marine life from synthetic chemicals is further bolstering the market growth. Besides this, the rising utilization of seeds, fruits, nuts, and vegetables, to stay healthy and prevent the occurrence of chronic lifestyle disorders, such as obesity, hypertension, stroke,

diabetes, thyroiditis, etc., is acting as another significant growth-inducing factor.

Moreover, government bodies across countries are promoting the use of biofertilizers to prevent the accumulation of chemical residues in agricultural products and reduce farming expenses, which is expected to fuel the fertilizer market over the forecasted period.

Some of the Top 9 [Largest Fertilizer Companies](#) in World

CF Industries

Haifa Group

Indian Farmers Fertiliser Co-operative Limited (IFFCO)

Israel Chemicals Ltd. (ICL)

Nutrien Limited

Sociedad Química y Minera (SQM)

The Mosaic Company

Uralkali

Yara International.
