

Human Microbiome Market: Current Status, Opportunities, and Future Prospects

The rising awareness of human microbiome therapy and the increasing incidence of chronic diseases is driving the demand for the market.

VANCOUVER, BC, CANADA, April 6, 2023 /EINPresswire.com/ -- The global [Human Microbiome Market](#) is forecasted to be worth USD 1,689.5 Million by 2027, according to a current analysis by Emergen Research. The Human Microbiome market is

anticipated to grow substantially owing to the rising awareness of human microbiome therapy. The market is also expected to boost by increasing favorable regulations on probiotics and prebiotics by regulatory bodies. Besides, the growing prevalence of chronic diseases is forecasted to further propel the market growth over the forecast timeframe. Globally, the

“

Market Size – USD 376.3 Million in 2019, Market Growth - CAGR of 21.8%, Market Trends – The rise in the favorable regulations on probiotics and prebiotics by regulatory bodies.

”

increasing prevalence of lifestyle-related diseases is a major driver of the human microbiome market, as therapeutic approaches can offer an effective method to address serious health issues, such as obesity, autoimmune disorders and susceptibility to antibiotics, genetic disorders, metabolic diseases, cancer, Crohn's disease, and bowel disorder.

The market for human microbiomes is expanding quickly due to the growing interest in microbiome-based treatments for various ailments. The group of microbes that reside on and inside the human body is referred to as the human microbiome. By controlling numerous

physiological processes, these microorganisms are essential for preserving human health. Market segments include product, application, and geographic ones. Prebiotics, probiotics, therapeutic foods, medical testing, and pharmaceuticals are all available products.

Gastrointestinal illnesses, metabolic disorders, neurological disorders, and immunological disorders are among the conditions for which the human microbiome market is used. Because chronic diseases are so common there, North America is predicted to hold the highest share of the human microbiome market.

Some Key Highlights from the Report

In January 2020, 4D Pharma PLC officially confirmed the launch of a trial exploring MRx0518 in patients with pancreatic cancer combined with radiation therapy, which is expected to enhance its expertise in research and development activities for cancer treatments.

Due to the increasing gastrointestinal conditions and the negative effects related to drugs, the therapeutics segment holds the major market over the forecast timeframe.

Over the forecast period, the Infectious diseases segment is expected to hold the largest market. The need for effective bacterial-targeted therapy for infectious diseases has been indicated by increasing awareness of the negative impacts of antibiotic application on natural flora.

Due to the growth in the number of clinical trials and the rapid adoption of new technology, North America is expected to lead the market during the forecast timeframe.

The leading contenders in the global Human Microbiome market are listed below:

Seres Therapeutics, Synlogic, Inc., Vedanta Biosciences, Inc., Evelo Biosciences, MicroBiome Therapeutics, LLC, 4D Pharma PLC, Osel Inc, MetaboGen AB, Symbiotix Biotherapies, Inc., Second Genome Inc.

Key reasons to buy the Global Human Microbiome Market report:

The latest report comprehensively studies the global Human Microbiome market size and provides useful inference on numerous aspects of the market, such as the current business trends, market share, product offerings, and product share.

The report offers an insightful analysis of the regional outlook of the market.

It offers a detailed account of the end-use applications of the products & services offered by this industry.

The report holistically covers the latest developments taking place in this industry. Therefore, it lists the most effective business strategies implemented by the market rivals for ideal business expansion.

The report also provides an extensive analysis of the key market elements, such as drivers, constraints, opportunities, limitations, threats, and micro and macro-economic factors. The exhaustive SWOT analysis, Porter's Five Forces analysis, feasibility analysis, and investment return analysis included in the report are intended to help the reader tactfully formulate business growth strategies. Strategic recommendations for the established market players assist them in fortifying their financial positions in the market.
