

# A Pioneering Collaboration in Luxury & Technology, Bmeta Unveils fully Customizable Metaverse-Ready Yacht Ordinal

*Powerful New Partnership Unveils Striking Unreal Engine 5 Digital Assets.*

TORONTO , CANADA , April 11, 2023 /EINPresswire.com/ -- ER Yacht Design, International award-winning design firm, in partnership with gazelle Bmeta Digital Development Co. , announces the maiden voyage of the "MY NAKAMOTO", the worlds first fully customizable [Metaverse](#)-ready yacht [ordinal](#).

Ordinal Inscriptions, similar to NFTs, are digital assets inscribed on a satoshi, the lowest denomination of a Bitcoin (BTC).

Bmeta Digital Development Co has grown over 2000% during this bear market. The company recently launched the creation of [Unreal Engine 5](#) (UE5) in-game assets, which can be used in many UE5 worlds such as Fortnite and multiple Metaverse projects. This move comes amid the rapid growth of Epic Games' Unreal Engine 5 development software, and we are seeing the launch of several virtual environments and games.

In an industry where innovation and collaboration drive success, the recent union of ER Yacht Design & Bmeta Digital Development Co, has sparked a remarkable synergy between their respective talents and expertise. By leveraging Bmeta's extensive experience in cutting-edge technology with the vast library of ER's world class designs; the newly formed partnership is poised to develop groundbreaking solutions that combine stunning aesthetics with unparalleled functionality.

This powerful partnership represents the perfect fusion of technology and art, enabling the

alliance not only to tackle existing market challenges but also to pave the way for new opportunities in their respective sectors. The unique blend of talent and passion is sure to leave a lasting impact on the industry, establishing a new benchmark for innovative excellence.

"There are five lifetimes of work in Mr. Erdevicki's portfolio, fully rendered, finely detailed massive vessels, essentially floating mansions," said Bman, CEO of Bmeta. "Our relationship has enabled Bmeta to have unprecedented access to an incredibly vast collection of unique assets."

Bmeta's motto is "no promises, only delivery", says Andre Timor, COO of Bmeta. "We truly are in a class of our own within this industry, delivering the full digital experience from day one."

"We are thrilled to announce the creation of in-game assets for the Metaverse industry," said Ivan Erdevicki, President, and CEO of ER Yacht Design. "We will take full advantage of our extensive existing library of over 100 fully designed yachts, many of which took 3-7 years to complete the design process. Working closely with Bmeta's team of developers, a new gamified library of ultra-realistic 3D models has been created. "We are confident that our assets will become a staple in the industry, and we look forward to working with game developers to bring their visions to life", says Erdevicki.

The creation of digital assets is just one example of how the Metaverse industry is blurring the lines between the virtual and physical worlds. Bmeta, in close collaboration with ER Yacht Design, is at the forefront of this movement, and their involvement in the industry will undoubtedly add value to the sector.

Finally, by using CAD drawings as the basis for Unreal Engine assets, designers and developers can take advantage of the drawings' high level of detail and accuracy. This ensures that the finished product is as close to the original design as possible, creating never before seen value in NFTs.
