

# HDPE Marine Board Outlasts Wood In Boat and Marine Applications

*Interstate Advanced Materials offers HDPE marine board, a saltwater resistant and UV resistant material for boat and marine applications.*

SACRAMENTO, CA, UNITED STATES, May 2, 2023 /EINPresswire.com/ -- In the boating and marine industry, materials must have specific properties to survive the constant exposure to seawater, storms, and UV rays. Boats and marinas have moved away from wood that will crack, peel, splinter, and rot over time to plastics and composite materials that are water resistant or waterproof. HDPE marine board from Interstate Advanced Materials is a saltwater resistant and UV resistant material that outlasts wood in boat and marine applications.

HDPE marine board is a self-lubricating material specifically manufactured for use in marine environments.

HDPE marine board is a self-lubricating material specifically [manufactured for use in marine environments](#). It has excellent resistance to salt water and moisture, and unlike wood or will not

“

Marine board has seen use as an alternative to wood and metal components in ships for furniture hatches, cover rails, decorative trim, cabinetry, countertops, benchtops, and more.”

rot, crack, peel, swell, rust, or absorb water. Like standard HDPE, marine board is a durable impact- and wear-resistant material that will not crack under heavy footfalls from pedestrian traffic or when dashed against the sides of a dock. Its textured surface helps hide scratches, dirt, and wear, and it is UV-stabilized to retain its natural color even after prolonged exposure to sunlight. Marine board resists many chemicals and is easy to clean – it is a low maintenance material compared to wood.

HDPE marine board is designed for use in marine

applications. It is thermoformable and easily machined using standard woodworking tools, allowing it to fit many component shapes and act as a replacement for wooden boat parts. Marine board has seen use as an alternative to wood and metal components in ships for furniture hatches, cover rails, decorative trim, cabinetry, countertops, benchtops, and more. [More specialized grades provide anti-skid properties](#) that make marine board more suitable for marina walkways.

Interstate Advanced Materials offers HDPE marine board and specialized grades in sheet stock shapes and cut-to-size options. [Save up to 30%+ on marine board and other materials](#) with an Interstate Advanced Materials membership. HDPE marine board outlasts and replaces wood for boat and marine applications – learn more about its uses by talking to a material expert at (800) 742-3444.
