

WAIV Technologies, Inc. Launches Two New GPS Tracker Models for Boat Rental Businesses

The WAIV XStream PRO and WAIV XStream Lite offer a range of features that cater to the needs of boat rental businesses.

SAN DIEGO, CALIFORNIA, USA, April 20, 2023 /EINPresswire.com/ -- WAIV Technologies, Inc., a leading provider of GPS tracking solutions, has announced the release of two new models in its product line specifically designed for boat and jet-ski rental businesses. The

WAIV XStream PRO and WAIV XStream Lite offer a range of features that cater to the needs of boat rental businesses, with a focus on improving operational efficiency and customer safety.

The WAIV XStream PRO is the premium model in the 2023 WAIV GPS tracker product line. It features advanced enhancements, including the ability to accept external power and analog inputs, providing extended battery life and enabling connection to a variety of sensors on a boat, such as bilge-pump sensors. Additionally, the WAIV XStream PRO has a built-in geo-fence siren that alerts rental businesses when a boat enters a dangerous area or exceeds a set speed limit.

The WAIV XStream Lite is the standard model in the 2023 WAIV GPS tracker product line. It is a lower cost option, with all of the basic features needed for tracking boats, including location and battery life information. The WAIV XStream Lite does not have a siren or external inputs, but it is still solar-powered, allowing for easy installation without any wires to connect.

"We are excited to launch two new models in our GPS tracker product line for boat rental businesses," said Magnus Berggren, CEO of WAIV Technologies, Inc. "Our devices provide boat rental businesses with the latest technology and features to ensure that their operations are efficient and their customers are safe."

WAIV Technologies, Inc.'s new GPS trackers are designed to provide boat rental businesses with real-time information about the location and condition of their rental fleet, enabling proactive

maintenance and improved customer service.

The GPS trackers are also easy to install and use, allowing businesses to start benefiting from the technology quickly.
