High adoption of digital equipment, increase in geriatric population, and adoption of minimally invasive surgeries drive the fluoroscopy and C-arms technology market. In addition, growth in government support and funding fuels the market further. However, shortage of skilled professionals is expected to restrain the market growth.

The fluoroscopy and C-arms technology market is segmented based on type, application, end user, and geography. By type, it is bifurcated into fixed systems and mobile systems. Based on application it is divided into cardiovascular, pain management, neurology, orthopedic, gastrointestinal, and others. The end user segment includes hospitals, clinics, nursing homes,

and research institutes. Geographically, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.
