

Revolutionizing Avionics: The Advancements in Aircraft Interface Devices

By aircraft type, the aircraft interface device market is bifurcated into civil and military.

PORTLAND, OR, UNITED STATES, April 10, 2023 /EINPresswire.com/ -- According to a recent report published by Allied Market Research, titled, "[Aircraft Interface Device Market](#) by Connectivity, Fit, and Aircraft Type: Global Opportunity Analysis and Industry Forecast, 2021–2030,"

Global **AIRCRAFT INTERFACE DEVICE** Market
Opportunities and Forecast, 2021-2030

Global Aircraft Interface Device Market is expected to reach **\$368.94 Million** by 2030.

Growing at a **CAGR of 9.3%** (2021-2030)

Aircraft Interface Device

Aircraft interface device enhances the performance of electronic flight bag applications, reduces fuel burn and efficiency, and provides important safety features, which are expected to drive the aircraft interface device market during the forecast period. However, issues relating to the certification from regulatory bodies and rise in the vulnerability of flight systems and electric flight bags are anticipated to hamper the growth of the market. Moreover, benefits associated with advanced in-flight entertainment services and rise in demand for situational awareness are expected to offer lucrative opportunities in future.

North America dominates the market, in terms of revenue, followed by Asia-Pacific, Europe, and LAMEA. The U.S. dominated the [global aircraft interface device market](#) share in North America in 2020, owing to increase in R&D activities, technological developments by big players, rapid adoption of innovative technologies in making safer, convenient, and efficient data transmission devices. North America is expected to grow at a significant rate during the forecast period, owing to rise in regulations regarding the development of reliable and efficient aircraft interface technologies.

COVID-19 Impact Analysis

By region, North America is anticipated to register the highest CAGR during the forecast period.
