Analyst View:

Rise in use of the oil and gas industry for improved oil recovery is the major propelling factor for the growth of the global market. Additionally, rise in demand for the anionic polyacrylamide due to its benefits such as high quality and efficiency, high molecular weight, moderate hydrolysis, high viscosity and fine solubility is driving factor for the growth of the target market. Moreover, increasing coal mining and processing industries are boosting factor for the growth of the target

market. In addition, the polyacrylamide is used for drinking water treatment and the industrial wastewater treatment is the fueling factor for the growth of the global market. However, polyacrylamide is the carcinogenic nature of acrylamide monomer is the major restraining factor for the growth of the target market. Furthermore, polyacrylamide is highly costly is another hampering factor for the global market.
