Needle coke is a high-quality, low-sulfur form of petroleum coke that is used in the manufacturing of graphite electrodes, which are used in electric arc furnaces for steel production. It is named for its needle-like shape, which is formed during the coke production process.

The needle coke market is driven by the growing demand for steel, particularly in emerging economies such as China and India. Needle coke is also used in the production of lithium-ion batteries and other high-performance products, which is further driving demand.
