Emergen Research

Asymmetric warfare and international border conflicts are two more factors contributing to the market's extraordinary expansion. Cross-border conflicts have also increased significantly recently, and there are more armed law enforcement personnel and taskforce battalions than ever before. Other minor market-driving variables that have a significant impact on market growth include the rising demand for smart weapons, decreased production costs for firearms due to 3D printing technology, and increased use of polymer in the arms sector.

The global market landscape of Arms & Ammunition is expected to remain in a very competitive and highly fragmented landscape consisting of a number of both the small start-ups, medium enterprises, and large conglomerates. During the projected era, increasing demand for

technological development and higher diversification in offered products ensure the enormous potential for the innovative players
