

# JuicePi Launches Kickstarter Campaign for Revolutionary 2-in-1 Hybrid Charger

*Boost power with JuicePi's magnetic power bank and wall plug combo with fast charging technology*

BROOMFIELD, CO, UNITED STATES, April 17, 2023 /EINPresswire.com/ -- Innovative tech company iSwift has launched a [Kickstarter campaign](#) to fund the production of their latest product, the JuicePi 2-in-1 Hybrid Power Bank Charger. This revolutionary device combines the convenience of a wall charger with the portability of a power bank, providing a versatile charging solution for busy individuals who are always on the go.

The JuicePi 2-in-1 Hybrid Charger features a unique magnetic design that allows the two parts to be attached and detached easily. Whether at home, in the office, or on the go, JuicePi offers a convenient and efficient snap-to-recharge feature to keep your power bank always fully charged, ensuring that you never run out of battery when needed the most. It is also a perfect choice for travelers because the magnetic combo design eliminates the need to bring tangled wires and messy cables on the go.

Creating a seamless charging network by getting extra wall chargers or power banks in addition to the original combo, so snap-n-charge is always accessible to the power bank anywhere, and users can instantly swap a drained battery for a fully charged one to keep charging nonstop.

The JuicePi 2-in-1 Hybrid Charger is also equipped with fast charging technology, delivering faster charging speed than traditional chargers. Detach the power bank and the wall charger and use them separately to charge up to three devices simultaneously, an excellent choice for families or individuals with multiple devices. With its compact and stylish design, JuicePi is the 'Apple' of chargers and is sure to impress anyone who sees it.

"We are thrilled to launch the 2-in-1 Hybrid Charger on Kickstarter," said the iSwift team. "Our mission is to provide the ultimate EDC charging solution for individuals who are always on the go. We believe that the iSwift will be a game-changer in the tech industry, and we can't wait to share it with the world."

The JuicePi 2-in-1 Hybrid Charger is compatible with a wide range of devices, including smartphones, tablets, laptops, and more. It is the perfect choice for anyone who needs to stay connected and powered up, whether they're traveling for work or leisure.

The Kickstarter campaign for the JuicePi 2-in-1 Hybrid Charger will run for 30 days, and backers will have the opportunity to receive exclusive rewards for their support. Backers will only be charged if the project meets its funding goal by the campaign deadline, ensuring that their investment is secure.

The JuicePi team will provide regular updates to backers throughout the production process,

ensuring that they are informed of any developments or changes. They will also work closely with the factory to monitor output and minimize any possible delays.

For more information on the JuicePi 2-in-1 Hybrid Charger and to support the Kickstarter campaign, please [visit the campaign page](#).
