Path Matching has created a substantial community impact through our anonymous matching technology. We provide a safe and secure way for survivors to share their testimony, and we match them by time, location, and description to reduce repeat offenders.

In addition to helping all survivors, our software is making it more accessible for survivors with disabilities to share what happens to them. It is imperative to create bridges between asking for help and receiving help.

Through our mission, we hope to empower survivors of sexual assault by creating safe places for them to share what happened, expand our community, and implement our resource guides.
