Fruit concentrate is a product made by removing water from fruit juice, resulting in a more concentrated juice. The process involves heating the juice to remove water and then cooling it to create a concentrated syrup. Fruit concentrate is used in the food and beverage industry as a sweetening or flavoring agent and has a longer shelf life than fresh juice because the concentrate reduces the risk of bacterial growth. Some common fruits used for fruit concentrates include apples, oranges, grapes, and pineapples. Fruit concentrate can be found in a variety of products such as sodas, juice blends, sauces, and jams.
