Biocides are chemical compounds or microorganisms that are used to biologically or chemically

eliminate, render harmless, discourage, or control a potentially harmful organism. Biocides are used in a variety of applications, including the addition of biocides to cosmetics and personal care products, the treatment of drinking water, the treatment of skin infections, and the protection of animal food from microorganisms. Chemical biocides are essential for ensuring water quality at all times in order to keep systems secure, well-maintained, and operating at peak performance.
