Based on drone type, the rotary wing segment held the largest market share in 2021, holding more than half of the global market, and is expected to maintain its leadership status during the forecast period. However, the hybrid segment, on the other hand, is expected to cite the fastest CAGR of 45.6% during the forecast period.

Based on range, the short-range segment held the largest market share in 2021, holding nearly three-fourths of the global market, and is expected to maintain its leadership status during the forecast period. Nevertheless, the long-range segment, on the other hand, is expected to cite the fastest CAGR of 46.5% during the forecast period.

By operation mode, the partially autonomous segment held the largest market share in 2021, holding more than half of the global market, and is expected to maintain its leadership status during the forecast period. However, the fully autonomous segment, on the other hand, is

expected to cite the fastest CAGR of 45.6% during the forecast period.
