

Myers-Holum and ProScope Partner to Advance Next-Generation Project Management

Myers-Holum and ProScope partner to bring next-generation project management to customers.

NY, UNITED STATES, April 13, 2023 /EINPresswire.com/ -- Myers-Holum, which has grown exponentially over the past three years and was awarded the Oracle NetSuite Regional Alliance

By partnering with Myers-Holum, we have established a unique synergy of industry-leading expertise and top-tier project management capabilities."

President of ProScope Sales -
North America*

Partner of the Year for North America in 2021 and 2022 for products, announced today its partnership with ProScope. A subsidiary of Cooper Software, ProScope offers cloud-based Enterprise Resource Planning (ERP) project management software designed to help businesses streamline their operations and improve project management efficiency.

ProScope specializes in task management, time and expense tracking, resource allocation, and project reporting and offers a native NetSuite application that seamlessly extends the platform's capabilities. ProScope

project management tools allow teams to collaborate and manage projects from start to finish.

"We're pleased to announce our partnership with ProScope," said Michael Boivin, VP of Sales & Operations at Myers-Holum. "ProScope strongly complements NetSuite's capabilities in complex project management for industries like construction, energy, oil and gas, logistics and shipping. ProScope provides crucial functionality and real-time data needed for each stage of the project life cycle."

With highly competitive rates and built to work in NetSuite, ProScope empowers companies to manage construction and service elements in one platform, which is what Myers-Holum customers are looking for to meet their complex project management needs.

"By partnering with Myers-Holum, we have established a unique synergy of industry-leading expertise and top-tier project management capabilities," said Warren McCrea, Vice President of ProScope Sales - North America. "Myers-Holum has an excellent reputation and tremendous credibility in the industries that ProScope services."

To meet the growing trend for businesses to combine construction and service activities under the same roof, they need software that can handle both. From estimating and scheduling to asset and resource management, financial management, and project billing, ProScope offers access to real-time data across departments with its extensive project management capabilities.

“ProScope is built on a robust platform that companies aren't going to outgrow, extending it by providing project management features that cater to both construction and service companies,” explained McCrea. “For instance, an HVAC company that builds and installs heating and cooling systems for commercial properties can also use ProScope to manage maintenance and tune-up services.”

As a NetSuite Alliance partner, Myers-Holum offers unique consulting and project management expertise, focusing on tailored solutions for each client. With a team of over 375 consultants and developers, they provide deep industry and technology expertise. “Myers-Holum is equipped to handle complex projects with the best possible results for their clients leveraging ProScope,” said McCrea.

To put leveraging ProScope in tangible terms, McCrea sites the ripple effect of, for example, when construction personnel complete a task in the field and that updates all the way back to the financials within the ERP. “That task in the field is tied to a project, that project is tied to an aspect of the business, which is reported on in real time without having to do any additional heavy lifting to make sure that they're integrated and updating on the same path,” McCrea explained. “With ProScope, each small change on the job site is reflected at the highest-level financials within the ERP.”

About ProScope

ProScope has been developed by Cooper Software, a leading NetSuite partner with a 17-year track record of supporting clients in the ERP space. ProScope is the culmination of that experience: an industry cloud solution that meets the needs and standards of a range of project-driven sectors, offering truly breakthrough performance. ProScope seamlessly extends and enriches NetSuite cloud ERP project management capabilities. [Get in touch](#) to find out how ProScope can help your project.
