Market Overview:

Burn care refers to the medical treatment and management of burn injuries, which can range from minor burns that only affect the top layer of skin to more severe burns that penetrate deep into the skin and underlying tissue. Burn care involves a multi-disciplinary approach that includes initial assessment, resuscitation, wound care, pain management, and rehabilitation. Treatment may also involve the use of topical or systemic medications, surgery, and other therapies, depending on the severity and extent of the burn injury. The ultimate goal of burn care is to promote healing, prevent infection, minimize scarring, and improve overall function and quality of life for the patient.

The global Burn care market is analyzed across By Product, Depth, end-users, and region. The report takes in an exhaustive analysis of the segments and their sub-segments with the help of tabular and graphical representation. Investors and market players can benefit from the breakdown and devise stratagems based on the highest revenue-generating and fastest-growing segments stated in the report.

By Product

- Biologics
- Traditional Burn Care
- Others

By Depth Of Burn

- Minor Burns
- Partial-thickness Burns
- Full-thickness Burns

By End User

- Hospitals
- Inpatient Hospitals
- Outpatient Hospitals
- Physician Offices
- Home Care
- Others

The market across North America held the largest share in 2019, contributing to nearly two-fifths of the market. This is due to development of technological advanced burn care products, upsurge in adoption of burn care products for the treatment of burns & burn-related injuries, change in preferences from traditional burn care products to advanced burn care products. However, the market across Asia-Pacific is expected to register the highest CAGR of 7.5% during the forecast period. This is due to rise in demand for advanced burn care products, improvement in health awareness, development in healthcare infrastructure, rise in number of laboratories with advanced medical facilities, surge in healthcare reforms, and increase in number of target population suffering from burns & burn-related injuries in emerging economies.
