Looking forward, IMARC Group expects the market to reach US\$ 59.6 Billion by 2028, exhibiting a growth rate (CAGR) of 4.9% during 2023-2028.

Gastrointestinal Therapeutics

Gastrointestinal Therapeutics Market Overview:

Gastrointestinal (GI) therapeutics are medications used to treat various digestive system disorders, including the stomach, intestines, liver, and pancreas. These medications are designed to alleviate symptoms such as nausea, vomiting, diarrhea, constipation, and abdominal pain and to treat underlying conditions such as gastroesophageal reflux disease (GERD), inflammatory bowel disease (IBD), and liver disease. GI therapeutics include many drugs, including proton pump inhibitors (PPIs), H2 receptor antagonists, antacids, laxatives, and anti-diarrheal agents. These medications are administered orally, rectally, or intravenously and are often combined with lifestyle changes such as dietary modifications and stress reduction techniques to manage GI conditions effectively.

Gastrointestinal Therapeutics Market Demand Analysis:

The global market is primarily driven by the increasing prevalence of gastrointestinal diseases,

such as inflammatory bowel disease, gastroesophageal reflux disease, and irritable bowel syndrome. In line with this, the expanding geriatric population and the growing demand for effective treatments are significantly contributing to the market. Furthermore, the advancements in drug delivery systems and the launch of new and innovative drugs are expected to catalyze the market. Apart from this, the escalating demand for biologics and targeted therapies for gastrointestinal disorders is positively influencing the market. Growing awareness of gastrointestinal disorders and their impact on quality of life is accelerating GI therapeutics demand worldwide. Moreover, the increasing healthcare expenditure and investments in research and development of new drugs are propelling the market. Developing combination therapies that target multiple pathways in treating gastrointestinal disorders is creating a positive outlook for the market. Besides, the rapid adoption of minimally invasive surgical procedures for gastrointestinal disorders is strengthening the market. The easy availability of over-the-counter gastrointestinal therapeutics for treating common gastrointestinal symptoms such as heartburn, indigestion, and constipation is anticipated to boost the market.
