

Healthmetryx Selected for Startup Showcase at World Summit AI Americas Conference

Health data analytics & AI company Healthmetryx one of 5 startup finalists chosen to present at world's leading AI summit.

BOSTON, MA, UNITED STATES, April 13, 2023 /EINPresswire.com/ -- Healthmetryx (HMX) has been

“

As we embrace the power of AI, we must ensure that its benefits are shared equitably, and that it is developed and used responsibly to build a better future for all.”

Louis A. Young, II, Founder and CEO, Healthmetryx, Inc.

selected to participate in the Startup Showcase at the World Summit AI Americas Conference being held at the Montreal Convention Centre in Montreal, Canada April 19 – 20, 2023. The company is one of 5 startup finalists selected by World Summit AI to share their next-generation solutions with the global AI community. Startups Showcase is a forum for recognizing and celebrating industry newcomers poised to revolutionize the global AI ecosystem.

“AI has the potential to transform every industry, deliver efficiency gains and cost savings, solve humanity's greatest

challenges, and create new products, services, and solutions previously unimaginable,” said Louis A. Young, II, Founder and Chief Executive Officer of Healthmetryx, Inc. “We are honored to have been selected to present our solution at World Summit AI Americas and be an active part of a global AI community that is, at this very moment, transforming the way we live, work, and interact with the world and each other.”

Healthmetryx is a health data analytics and artificial intelligence (AI) startup company. HMX leverages a patent-pending, wearable, exhaled-breath data-collection device and a cloud-based, breath-analysis AI to support customer programs advancing drug development, clinical decision-making, population health management research, and personalized respiratory health and wellness.

Per their website, World Summit AI Americas is the world's leading AI summit for the Americas. It brings together global AI leaders from enterprise, big tech, startups, academia, law, government and investment to hear the world's brightest AI brains deliver innovative, cutting-edge, topical content, tackle the most burning AI issues, and set the global AI agenda.

“AI has changed the world forever, and is arguably the most disruptive global force since the

harnessing of fire and the creation of electricity," said Mr. Young. "As we embrace the power of AI, we must ensure that its benefits are shared equitably, and that it is developed and used responsibly to build a better future for all."

About Healthmetryx, Inc.

Healthmetryx, Inc. (HMX), of Boston, Massachusetts, is a health data analytics and artificial intelligence (AI) startup company. HMX leverages a patent-pending, wearable, exhaled-breath data collection device (The Clarinet®) and a cloud-based, breath-analysis AI (Respiratory Cloud Machine®) to support customer programs advancing drug development, clinical decision-making, population health management research, and personalized respiratory health and wellness. Through the Clarinet, Healthmetryx produces anonymized, real-time, exhaled-breath data and ambient air-composition data. The company's business model consists of: Cluster Analysis Program for exhaled breath data collection & origination; Respiratory Cloud Machine AI for breath data research and analysis via artificial intelligence & machine learning; and Informatics Advisory Group for exhaled breath data science consulting. The firm's mission is to provide respiratory, early-detection capability by democratizing access to personal health data and to deliver AI that enables researchers to exponentially increase life-improving opportunities. Founded in 2020, HMX holds two patent licenses in partnership with the National Aeronautics and Space Administration (NASA) to develop breath-based, health-monitoring technologies.
