LEANDER, TEXAS, UNITED STATES, April 25, 2023 /EINPresswire.com/ -- Making changes to a home typically requires a lot of time, effort, and money, and there hasn't always been a way to ensure satisfaction. Now, thanks to Rustico Tile & Stone, homeowners looking to add handmade [terracotta tiles](#) to their properties can clearly visualize what the finished project will look like before getting started with the renovation.

Use the Room Visualizer Tool to see Terracotta Tile flooring.

The company recently launched a Room Visualizer tool that allows users to create a virtual preview of how their tiles will look in their homes. To get started, homeowners just need to upload a picture of their room and select their preferred terracotta tile pattern and color. The tool will then do the rest, presenting a realistic interpretation of the fitted tiles, which can be virtually placed on the floor and walls. Customers that do not have a clear photo of their room can also use one of the many templates available from within the room visualizer tool.

“

The Room Visualizer tool is a game changer for our customers. It's easy to use and lets our customers see, in a virtual way, how beautiful Saltillo tiles look in their space before spending money.”
