

# Silicon Beach Treatment Center: Inpatient Addiction Treatment Allowing Clients to Bring Their Dogs

*Silicon Beach Treatment Center: Inpatient Addiction Treatment with Dog-Friendly Policy - Empowering Clients to Bring Their Beloved Dogs Along for Recovery.*

LOS ANGELES, CALIFORNIA, UNITED

STATES, April 17, 2023 /EINPresswire.com/ -- [Silicon Beach Treatment Center](#), a leading addiction treatment facility located in the heart of Silicon Beach, is proud to announce a unique and innovative approach to inpatient addiction treatment - allowing clients to bring their dogs with them to treatment. This groundbreaking program is designed to enhance the therapeutic experience and promote emotional healing for clients during their recovery journey.

“

The presence of dogs in the treatment environment has been shown to create a calming effect and enhance the therapeutic process.”

*Alexia Rigos, Clinical Director*

At Silicon Beach Treatment Center, we understand the deep bond between humans and their pets and the positive impact that pets can have on mental health and emotional well-being. We believe that by allowing clients to bring their dogs to treatment, we can create a more supportive and nurturing environment for their recovery.

This unique program sets Silicon Beach Treatment Center apart from other addiction treatment facilities. Many traditional treatment centers do not allow pets, which can be a barrier for individuals who are hesitant to seek treatment due to the fear of leaving their beloved pets behind. Silicon Beach Treatment Center recognizes that pets can serve as valuable companions during the recovery process, providing comfort, companionship, and a sense of purpose to clients.

The inclusion of dogs in the treatment process has proven to be beneficial in many ways. Dogs can help reduce stress and anxiety, provide emotional support, and serve as a source of unconditional love and acceptance. They can also encourage physical activity, promote social interaction, and help clients develop a sense of responsibility and routine.

"We have seen incredible outcomes with our unique program that allows clients to bring their dogs to treatment," said Alexia Rigos, the Clinical Director of Silicon Beach Treatment Center. "The presence of dogs in the treatment environment has been shown to create a calming effect and enhance the therapeutic process. Clients who are able to bring their dogs to treatment often report feeling more motivated, engaged, and emotionally supported throughout their recovery journey."

In addition to the inclusion of dogs in the treatment process, Silicon Beach Treatment Center offers a comprehensive range of evidence-based therapies, holistic approaches, and individualized treatment plans to address the physical, emotional, and psychological aspects of addiction. The center's experienced and compassionate team of professionals provides round-the-clock care in a serene and supportive environment.

Silicon Beach Treatment Center's unique approach to allowing clients to bring their dogs to treatment has garnered widespread attention and recognition in the addiction treatment field. The center has received numerous accolades for its innovative program and commitment to providing cutting-edge, compassionate care to individuals struggling with addiction.
