

SEQSTER and CLEAR Forge Partnership to Drive Innovation and Improve Patient Outcomes with Real-World Data

The partnership empowers patients to securely connect and collect their real-time medical records for clinical trials

SAN DIEGO, CA, USA, April 17, 2023

/EINPresswire.com/ -- At the HIMSS

Global Health Conference, [SEQSTER](#)

PDM Inc. ("SEQSTER"), a pioneer in

patient-centric healthcare data

technology and patient management,

launched a partnership with CLEAR

(NYSE: YOU), the trusted secure

identity platform, to provide patients

with Individual Access Services and

allow them to securely access, control

and share their personal health

information with authorized users.

SEQSTER has integrated the CLEAR

platform to allow patients to

seamlessly confirm their identity,

access their medical records, and

safely share them with various clinical trial research organizations within the SEQSTER Operating System for healthcare.

SEQSTER and CLEAR Forge Partnership

With this partnership, patients can now affirm their identity – with just a government-issued ID and a selfie – to easily create and manage their SEQSTER account. Once a SEQSTER patient verifies their identity and creates their account, they can securely share their personal health information with SEQSTER's life sciences partners.

"Our partnership with CLEAR is a testament to our commitment to advancing healthcare through innovative technologies and partnerships. With our combined expertise, we can make real-world data more accessible, meaningful and impactful for patients, researchers, and healthcare organizations," said Ardy Arianpour CEO & Co-Founder at SEQSTER.

"The Powered by CLEAR platform makes it easy for patients to safely access and share their health information in a matter of minutes," said Caryn Seidman-Becker, CEO of CLEAR. "This partnership means patients or clinical trial staff can spend more time focused on improving health and less time making phone calls to track down health records. CLEAR is excited to be working with SEQSTER to foster a more secure and less stressful patient clinical trial experience."

"As a SEQSTER client, we know the value of real-world data in driving innovation and improving patient outcomes. The partnership between SEQSTER and CLEAR is an exciting development for the industry, and we're looking forward to working with SEQSTER to access faster, more accurate data and ultimately deliver better treatments to patients," states Paul Petraro, Global Head of Real World Evidence Centre of Excellence for Boehringer Ingelheim.

About SEQSTER

SEQSTER is the leading healthcare technology company that breaks down health data silos at scale. Its enterprise operating system aggregates disparate health data sources into a single, 360-degree view of a patient in real-time, solving a multitude of challenges for life sciences, patient engagement and data interoperability.

SEQSTER has nationwide coverage of EHRs from hospitals and medical groups, genomic DNA, wearables, pharmacy and social determinants of health data. Through its customizable white-label approach, SEQSTER provides accelerated access to de-identified, tokenized, real-time data and comprehensive curated data to address critical needs across the healthcare continuum.

SEQSTER is privately held and headquartered in San Diego.
