There are many reasons why an Organization should conduct market research, Some of the important ones are below:

UNCERTAINTY: Extreme uncertainty is one of the defining features of an Organization because

there is uncertainty about the product or outcome, the stock chain, the target customer segment, the business model, and almost every other aspect of the business.

INABILITY TO BE SELF-CRITICAL: With a lack of proper marketing research, the product fails because the target audience didn't share your idea of this innovative and amazing product and the product fails to sign in with the target market and gets an underwhelming response.

COMPETITION AND CUSTOMERS: Unless a proper analysis of the market competition is done, the company cannot size the market opportunity and the potential growth in the market. Emerging strategies about pricing, marketing, buying, etc. need to be done based on a thorough knowledge of the target customers and the evaluation of competition that the company is going to face in the market

SECURING FUNDING: Without proper marketing research, it is difficult to base and justify how your product would be successful in the market and why it is worth spending a large amount of money from an investor.
