audio, like a CD player, MP3 player, or an audio mixer, then broadcast the signal to an FM receiver, say, a FM radio, which can be located in any range of the transmitter. The signal can be broadcasted to the entire area, or alternatively to certain parts of the bars, pubs, restaurants, and clubs.

This 0.5w FM Transmitter Kit is cost-effective, easy to set up and provides distinct broadcasting in a range of up to 2-5 kilometers (1.2-3.1 miles), which is ideal for businesses in the local area, as it allows them to broadcast to customers who are close to the business location. The scope of the transmitter permits businesses to reach out to people that are within the range of the signal and let them know about their services or products. This can help businesses raise their sales and revenue.

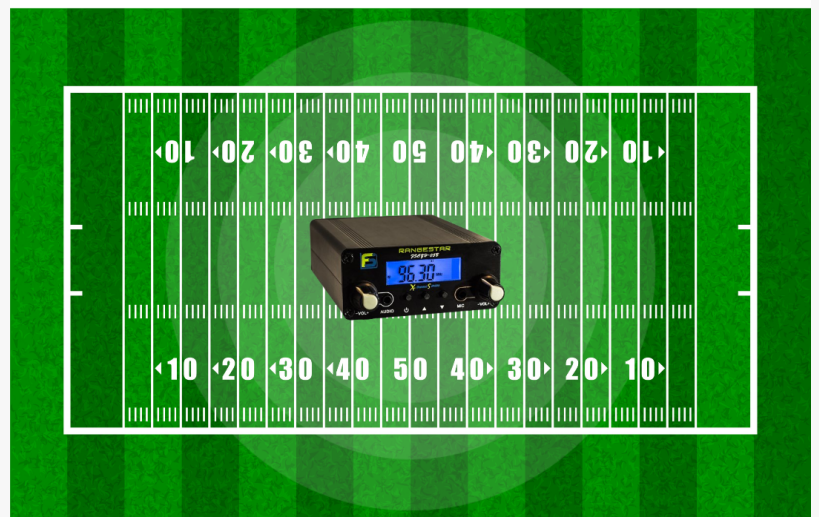

In addition, FMSUER FS-05B 0.5W FM Transmitter also has the following features

- Cost-effective
- High-quality aluminum alloy
- Compact size and exquisite design
- Low interference with adjacent transmitters.
- Sweet sound quality
- Adjustable power between 100mW and 500mW
- Full-band work with arbitrary frequency settings within 76M~108M
- Microphone input port
- Adjustable input volume
- Five-digit LCD blue backlight that displays the frequency.
- Easy to install and integrate into any space.
