

The Role of Light Commercial Vehicles in Urban Logistics and Last-Mile Delivery

Global light commercial vehicle (LCV) market to reach \$786.50 billion by 2030

PORTLAND, OREGON, UNITED STATES, April 18, 2023 /EINPresswire.com/ -- As per the report published by Allied Market Research, the global [light commercial vehicle market](#) was pegged at \$463 billion in 2020, and is projected to garner \$786.5 billion by 2030, manifesting a CAGR of 5.3% from 2021 to 2030. The report offers an extensive analysis of changing market trends, top investment pockets, value chain, key segments, and competitive landscape.

Development of industrial activities, advancements in the automotive industry, and growth in e-commerce industry fuel the global light commercial vehicle (LCV) market. On the other hand, stringent emission norms hinder the market growth. Moreover, rise in government initiatives for promotion of e-mobility and surge in demand for electric LCVs from the logistics sector are projected to open lucrative opportunities in the future.

Covid-19 scenario:

The outbreak of COVID-19 pandemic led to flight cancellations, travel bans, and quarantines, which disrupted the supply chain and halted logistics activities across the world.

As a consequence of the COVID-19 outbreak, countries were left with no choice but to temporarily suspend their trading activities, which adversely impacted the supply of goods, disrupted the supply chain.

However, the nations have entered the unlock phase with vaccinations drives on board. With this drift on, the market is expected to recoup soon.
