

Flight simulators Market value to exceed USD 12.39 billion by 2030 | Exclusive Report by Emergen Research

Discover how flight simulator companies are fueling the growth of the flight simulator market with innovative technology and cost-effective solutions

VANCOUVER, BC, CANADA, April 19, 2023 /EINPresswire.com/ -- Emergen Research has recently published a comprehensive research study titled "[Flight Simulator Market is Growing Rapidly](#)", indicating a rising interest in Flight Simulator research in the year 2023.

The global flight simulator market size reached USD 6.90 Billion in 2021 and is expected to register a revenue CAGR of 6.7% during the forecast period, according to latest analysis by Emergen Research. Consumers growing desire for air travel is a primary factor driving market revenue growth. In addition, rising disposable income and increased air travel affordability among others are all contributing to market revenue growth. India, Indonesia, and other countries are seeing an increase in start-ups connected to enhanced flight simulator systems. This is primarily owing to the increased number of aviation training institutes in these countries. The rising need for qualified pilots in various countries is a major factor driving market revenue growth. For instance, the aviation industry has experienced rapid growth in recent years. This is attributable to a rise in global aviation traffic and tourism activities.

“ Flight Simulator Market Size – USD 6.90 Billion in 2021, at a CAGR of 6.7%, – Significant investments in manufacturing enhanced technology systems owing to stringent federal aviation regulations

Rapid use of simulators due to worker reskilling is a key factor driving market revenue growth. Many businesses have identified reskilling as a critical concern. As a result, approaches based on tried-and-true learning methodologies and cutting-edge technology have the potential to improve the effectiveness and efficiency of skill training. People are placed in immersive, true-to-life environments where they practice skills acquisition in situations that mimic job conditions. These immersive settings frequently include game components, which increase motivation, attention, and learning. In the aviation business, for instance, pilots use flight simulators because their training necessitates reinforcement, periodic upgrading in new settings, and continual motivation, all of which are byproducts of a good developmental process.
