

Tresorit Wins the Global InfoSec Awards at the RSA & Publishes its roadmap for 2023 with Focus on User-Centric Security

Tresorit snags the Next Gen Zero Trust Award at the Global InfoSec Awards at RSA while revealing plans for 3 main innovations within their existing products.

ZURICH, CA, SWITZERLAND, April 24, 2023 /EINPresswire.com/ -- [Tresorit](#), the leading Swiss-Hungarian end-to-end encrypted ("e2ee") cloud collaboration specialist and subsidiary of Swiss Post today is pleased to announce that they have won the Next Gen Zero Trust Award by Cyber Defense Magazine ([CDM](#)), the industry's leading electronic information security magazine at the [RSA](#) Conference 2023.

"We're thrilled to receive this prestigious award, recognizing our commitment to provide the best data security solutions with a combination of encryption, highest usability, and a Zero Knowledge approach. This award reinforces our dedication to empower businesses and individuals to protect their confidential information in today's digital age. We'll continue to innovate and improve our products to deliver a seamless user experience while never compromising on security" said Rodrigo Nieto, Senior Sales Manager for the Americas at Tresorit.

"We scoured the globe looking for cybersecurity innovators that could make a huge difference and potentially help turn the tide against the exponential growth in cyber-crime. Tresorit is absolutely worthy of this Zero Trust award and consideration for deployment in your environment," said Yan Ross, Editor of Cyber Defense Magazine.

Along with winning the prestigious award, Tresorit has also published a roadmap with the most important strategic milestones for 2023. At the heart of the planned innovations is a user-centric approach that will be reflected in all the products and services to be developed. The planned innovations within the Tresorit solution are expected to be published later this year. It is planning three main innovations within existing products. The roadmap includes the following:

Tresorit, leading the Swiss-Hungarian end-to-end encrypted ("e2ee") cloud collaboration specialist

- Greater convenience for users

To make it even easier to use Tresorit in day-to-day operations, Tresorit is planning to release “Tresorit for Microsoft” later this year. This will provide native integration of the application in a variety of Microsoft solutions, such as Office 365 and Teams, so it will act as an invisible layer of security.

- Greater flexibility for tailored usage

To ensure that Tresorit is tailored to the individual needs of customers, Tresorit is working this year on launching a new product package for secure communication. In future, it will be possible to put together the secure features of Tresorit such as email encryption, secure data storage and e-signatures as a modular package.

- Greater security for sensitive data and documents

To further improve the security of emails and documents, Tresorit is planning additional features for its existing solutions. In the coming months, the qualified e-signature feature will be available throughout Europe and will be in addition to the simple e-signature already in use.

For details of the product enhancements made in the past year as well as all the current features of Tresorit please visit <https://tresorit.com/>

About Tresorit

Tresorit is an end-to-end encrypted productivity solution for ultra-secure collaboration including managing, storing, syncing, and transferring files. More than 10,000 businesses use Tresorit to protect their confidential data and securely share information. Since July 2021, Tresorit’s majority shareholder is the Swiss Post.
