Aggressive initiatives by federal organizations, such as Federal Aviation Administration (FAA) and EUROCONTROL are coming up with the standardize protocol to support global growth. As of June 2022, FAA 45,000 flights were handled by FAA per day, with 520 airport traffic control towers, 147 terminal radar approach control facilities, and more than 14,000 air traffic controllers. With the growing air traffic control operations, the demand for efficient air traffic management system is increasing, which is anticipated to be achieved by integration of cutting edge technologies, such as remote towers. Several major airports from developed and developing nations such as the U.S., China, Canada, UK, Germany, and India among others have already started investing in these technologies, which is expected fuel the growth of the [remote towers market](#).

The remote tower market is segmented on the basis of application, end user, operation type, offering, and region. By application, it is divided into communication, information & control, flight data handling, surveillance, and visualization. By end user, it is divided into military airport and commercial airport. By operation type, it is divided into single, multiple, and contingency. By offering, it is segmented into hardware, software & solutions, and services. By region, the

market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.
