According to HTF Market Intelligence, the Global Threat Intelligence Software market to witness a CAGR of 14.5% during forecast period of 2023-2028. Global Threat Intelligence Software Market Breakdown by Application (Security Information and Event Management, Government, Risk and Compliance, Business Continuity Planning and Management) by Component (Solutions, Services) by Deployment Mode (Cloud, On-premises) and by Geography (North America, South America, Europe, Asia Pacific, MEA).

Threat Intelligence Software Market

HTF Market Intelligence is a leading market research company providing end-to-end syndicated and custom market reports, consulting services, and insightful information across the globe.”

Craig Francis

“In August 2022, Flashpoint Acquires Open Source Intelligence Leader Echosec System, this acquisition will bring best-in-class open-source, social media, and geospatial intelligence to Flashpoint, further differentiating Flashpoint’s offerings for national security, public safety, and commercial security teams”

Definition:

Threat intelligence software refers to a type of cybersecurity software that helps organizations gather, analyze, and share information about potential cyber

threats, such as malware, phishing attacks, and other malicious activities. It leverages various data sources, such as social media, dark web forums, and threat feeds, to provide organizations with actionable intelligence to identify and respond to potential threats proactively. Threat intelligence software may also incorporate machine learning and other advanced technologies to automate threat analysis and improve the accuracy and speed of threat detection and response.

Market Trends:

- Increasing number of cyber-attacks and data breaches is driving the demand for threat intelligence software.
- Rising adoption of cloud-based threat intelligence solutions.
- Integration of artificial intelligence and machine learning technologies in threat intelligence software.
- Growing trend of outsourcing threat intelligence services to third-party vendors.

Market Drivers:

- Need for real-time threat intelligence to identify and mitigate security threats.
- Growing demand for proactive and predictive threat intelligence.
- Increasing complexity and sophistication of cyber-attacks.
- Need for compliance with data protection regulations.

Market Opportunities:

- Growing adoption of Internet of Things (IoT) devices is creating new opportunities for threat intelligence software providers.
- Increasing demand for threat intelligence solutions from small and medium-sized enterprises (SMEs).
- Emergence of new threat intelligence use cases such as insider threat detection.

The titled segments and sub-section of the market are illuminated below:

The Study Explore the Product Types of Threat Intelligence Software Market: Cloud, On-

premises

Key Applications/end-users of Threat Intelligence Software Market: Security Information and Event Management, Government, Risk and Compliance, Business Continuity Planning and Management

With this report you will learn:

- Who the leading players are in Threat Intelligence Software Market?
- What you should look for in a Threat Intelligence Software
- What trends are driving the Market
- About the changing market behaviour over time with strategic view point to examine competition

Also included in the study are profiles of 15 Threat Intelligence Software vendors, pricing charts, financial outlook, swot analysis, products specification & comparisons matrix with recommended steps for evaluating and determining latest product/service offering.

List of players profiled in this report: Lookout, Inc. (United States), McAfee, LLC (United States), Cylance Inc. (United States), Symantec Corporation (United States), Cisco Systems (United States), Sophos Ltd. (United States), Alert Logic, Inc. (United States), SolarWinds Inc. (United States)

Who should get most benefit from this report insights?

- Anyone who are directly or indirectly involved in value chain cycle of this industry and needs to be up to speed on the key players and major trends in the market for Threat Intelligence Software
- Marketers and agencies doing their due diligence in selecting a Threat Intelligence Software for large and enterprise level organizations
- Analysts and vendors looking for current intelligence about this dynamic marketplace.
- Competition who would like to benchmark and correlate themselves with market position and standings in current scenario.
