Rise in demand for rapidly deployable & scalable data centers, surge in adoption of cloud services by SMEs, increase in demand for green data centers, upsurge in expansion of global data center industry players in the South America, and growing investments to develop advanced data centers during the COVID-19 pandemic drive the South America modular data center market.

The South America modular data center market is segmented on the basis of component,

South America Modular Data Center

enterprise size, and industry vertical. By component, the market is categorized into solution and services. By enterprise size, it is classified into small & medium enterprises and large enterprises. By industry vertical, it is segregated into BFSI, IT & telecom, retail, manufacturing, healthcare, energy, media & entertainment, government, and others. Country wise, it is analyzed across Brazil, Argentina, Colombia, Chile, Peru, Uruguay, and Rest of South America.

Covid-19 Scenario:

□ Proliferation of emerging technologies such as artificial intelligence (AI), big data, and Internet of things (IoT) has led to significant rise in storage volume requirement, which in turn has impacted the South America modular data center market positively.

□ This trend is most likely to persist post pandemic as well.
